

CITY OF HAYWARD

AGENDA REPORT

AGENDA DATE 02/02/05

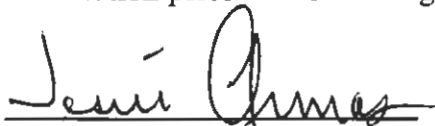

AGENDA ITEM 1

TO: Route 238 Working Group

FROM: City Manager

SUBJECT: Consideration and Discussion of Mini-Loop Concept

On November 9, 2004, the City Council approved a revised version of the Route 238 Corridor Improvement Project that minimized right of way takes in the downtown. The purpose of this working group meeting is to present and get feedback on a new mini-loop concept that staff has developed, which is discussed in the attached worksession agenda report of January 18, 2005. Since the worksession presentation, staff and our consultants have been refining the mini-loop proposal based on preliminary traffic analysis. It is anticipated that by early next week we will be able to distribute by e-mail additional information that is not yet completed. This information will include refined lane and intersection geometrics as well as initial LOS results from our preliminary traffic analysis. Thus, it is hoped you will be able to review the refined information prior to our meeting.

Jesús Armas, City Manager
